Ontario Province

Reference Group Executive Summary
Spring 2013

The ACHA-NCHA II supports the health of the campus community by fulfilling the academic mission, supporting short- and long-term healthy behaviors, and gaining a current profile of health trends within the campus community.
Introduction

The ACHA-National College Health Assessment II (ACHA-NCHA II) is a national research survey organized by the American College Health Association (ACHA) to assist college health service providers, health educators, counselors, and administrators in collecting data about their students' habits, behaviors, and perceptions on the most prevalent health topics.

ACHA initiated the original ACHA-NCHA in 2000 and the instrument was used nation wide through the spring 2008 data collection period. The ACHA-NCHA now provides the largest known comprehensive data set on the health of college students, providing the college health and higher education fields with a vast spectrum of information on student health.

The revised survey, the ACHA-NCHA-II, was developed following a thorough pilot testing process. Although the general categories of information for which data are collected remain the same between the original ACHA-NCHA and this revised survey, a number of questions have been modified, and new questions have been added to monitor a variety of health constructs. Specific revisions include updated lists of illegal drugs, contraceptive methods, and vaccines. New items have been added to capture sleep behaviors, self-injury, the use/abuse of prescription drugs and additional mental health issues.

Please note the ACHA-NCHA II is not appropriate for trend comparison of items from the original ACHA-NCHA survey. A new baseline for ACHA-NCHA II began in the fall of 2008. Directly comparing pre- and post-redesign estimates on similar data points, without taking into account the impact of the survey’s redesign, might lead to an erroneous conclusion. Documentation regarding the results of the pilot study and differences between the instruments can be obtained at the ACHA-NCHA website, www.acha-ncha.org.

For additional information about the survey’s development, design, and methodology, email Mary Hoban, PhD, CHES, (mhoban@acha.org), E. Victor Leino, PhD (vleino@acha.org), or visit www.acha-ncha.org.

Note on use of data:

| Missing values have been excluded from analysis. Students responding "not applicable" were excluded from several analyses, which are specifically noted throughout this document. All response categories were included, including "don't know" or "0" unless otherwise noted. |

This Executive Summary highlights results of the ACHA-NCHA II Spring 2013 survey for Ontario Province Reference Group consisting of 16,123 respondents. The overall response proportion was 19.1%.
Findings

A. General Health of College Students

- 51.1% of college students surveyed (55.8% male and 49.2% female) described their health as *very good or excellent*.

- 87.5% of college students surveyed (89.3% male and 87.0% female) described their health as *good, very good or excellent*.

Proportion of college students who reported being diagnosed or treated by a professional for any of the following health problems within the last 12 months:

<table>
<thead>
<tr>
<th>Condition</th>

</tbody>
</table>
B. Disease and Injury Prevention

College students reported receiving the following vaccinations (shots):

- 73.6% reported receiving vaccination against hepatitis B.
- 25.3% reported receiving vaccination against Human Papillomavirus/HPV (cervical cancer vaccine).
- 24.0% reported receiving vaccination against influenza (flu) in the last 12 months (shot or nasal mist).
- 61.5% reported receiving vaccination against measles, mumps, rubella.
- 47.2% reported receiving vaccination against meningococcal meningitis.
- 34.0% reported receiving vaccination against varicella (chicken pox).

Other disease prevention practices reported by college students:

- 76.5% reported having a dental exam and cleaning in the last 12 months.
- 22.4% of males reported performing a testicular self exam in the last 30 days.
- 25.0% of females reported performing a breast self exam in the last 30 days.
- 34.1% of females reported having a routine gynecological exam in the last 12 months.
- 53.0% reported using sunscreen regularly with sun exposure.
- 19.8% reported ever being tested for Human Immunodeficiency Virus (HIV) infection.

College students reported the following behaviors within the last 12 months:

<table>
<thead>
<tr>
<th>Percent (%)</th>
<th>N/A, did not do this activity within the last 12 months</th>
<th>Never*</th>
<th>Rarely or sometimes*</th>
<th>Mostly or always*</th>

<td>90.6</td>
</tr>
<tr>
<td>Wear a helmet when you were inline skating</td>
<td>77.4</td>
<td>59.0</td>
<td>17.6</td>
<td>23.4</td>
</tr>
</tbody>
</table>

*Students responding "N/A, did not do this activity within the last 12 months" were excluded.*
C. Academic Impacts

Within the last 12 months, students reported the following factors affecting their individual academic performance, defined as: received a lower grade on an exam, or an important project; received a lower grade in the course; received an incomplete or dropped the course; or experienced a significant disruption in thesis, dissertation, research, or practicum work; (listed alphabetically):

Alcohol use: 4.6 %  Gambling: 0.3 %
Allergies: 1.9 %  Homesickness: 5.9 %
Anxiety: 29.9 %  Injury: 2.9 %
Assault (physical): 0.6 %  Internet use/computer games: 24.0 %
Assault (sexual): 0.8 %  Learning disability: 3.5 %
Attention Deficit/Hyperactivity Disorder: 4.4 %  Participation in extracurricular activities: 10.1 %
Cold/Flu/Sore throat: 22.2 %
Concern for a troubled friend or family member: 16.2 %
Chronic health problem or serious illness: 3.9 %
Chronic pain: 3.9 %  Sexually transmitted disease/infection (STD/I): 0.4 %
Death of a friend or family member: 7.0 %
Depression: 19.2 %  Sinus infection/Ear infection: 6.3 %
Discrimination: 1.3 %  Bronchitis/Strep throat: 28.5 %
Drug use: 2.0 %  Sleep difficulties: 40.7 %
Eating disorder/problem: 2.0 %  Stress: 16.6 %
Finances: 9.4 %  Other: 3.0 %

D. Violence, Abusive Relationships and Personal Safety

Within the last 12 months, college students reported experiencing:

<table>
<thead>
<tr>
<th>Factor</th>
<th>Percent (%)</th>
<th>Male</th>
<th>Female</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>A physical fight</td>
<td>9.7</td>
<td>3.9</td>

<td>11.4</td>
<td></td>
<td>19.1</td>
</tr>
</tbody>
</table>

E. Alcohol, Tobacco, and Other Drug Use

Reported use versus perceived use - reported use for all students within the past 30 days compared with how often students perceived the typical student on campus used substances within the same time period. The last line of each table combines all categories of any use in the last 30 days.

<table>
<thead>
<tr>
<th>Alcohol</th>

</table>

*Includes cigars, smokeless tobacco, cocaine, methamphetamine, other amphetamines, sedatives, hallucinogens, anabolic steroids, opiates, inhalants, MDMA, other club drugs, other illegal drugs. (Excludes alcohol, cigarettes, tobacco from a water pipe, and marijuana).

- 0.7 % of college students reported driving after having 5 or more drinks in the last 30 days.*
- 13.0 % of college students reported driving after having any alcohol in the last 30 days.*

*Students responding "N/A, don't drive" and "N/A don't drink" were excluded from this analysis.

Estimated Blood Alcohol Concentration (or eBAC) of college students reporting 1 or more drinks the last time they "partied" or socialized. **Students reporting 0 drinks were excluded from the analysis.**

Due to the improbability of a student surviving a drinking episode resulting in an extremely high eBAC, all students with an eBAC of 0.50 or higher are also omitted from these eBAC figures. eBAC is an estimated figure based on the reported number of drinks consumed during the last time they "partied" or socialized, their approximate time of consumption, sex, weight, and the average rate of ethanol metabolism.

#### Estimated BAC

# Demographics and Student Characteristics

## Age:
- Average age: 22.15 years
- Median: 21.00 years
- Std Dev: 5.25 years

18 - 20 years: 45.6 %
21 - 24 years: 38.0 %
25 - 29 years: 9.7 %
30+ years: 6.7 %

## Gender*
- Female: 67.7 %
- Male: 30.6 %
- Transgender: 0.2 %

## Student status:
- 1st year undergraduate: 22.1 %
- 2nd year undergraduate: 21.3 %
- 3rd year undergraduate: 19.7 %
- 4th year undergraduate: 17.5 %
- 5th year or more undergraduate: 5.7 %
- Graduate or professional: 13.1 %
- Not seeking a degree: 0.2 %
- Other: 0.5 %

- Full-time student: 94.0 %
- Part-time student: 5.1 %
- Other student: 0.9 %

## Relationship status:
- Not in a relationship: 52.9 %
- In a relationship but not living together: 34.3 %
- In a relationship and living together: 12.8 %

## Marital status:
- Single: 86.6 %
- Married/Partnered: 9.5 %
- Separated: 0.4 %
- Divorced: 0.5 %
- Other: 3.0 %

* Cases where sex is missing are included in the calculation of percentages for this variable

## Students describe themselves as:
- Aboriginal: 1.8 %
- Arab: 2.4 %
- Black: 3.9 %
- Chinese: 11.7 %
- Filipino: 1.8 %
- Japanese: 0.5 %
- Korean: 1.4 %
- Latin American: 2.2 %
- South Asian: 9.5 %
- Southeast Asian: 2.2 %
- West Asian: 1.6 %
- White: 62.0 %
- Multiracial: 4.0 %
- Other: 4.0 %

## International Student:
- International: 9.7 %

## Students describe themselves as:
- Heterosexual: 90.4 %
- Gay/Lesbian: 2.5 %
- Bisexual: 4.3 %
- Unsure: 2.7 %

## Housing:
- Campus residence hall: 14.8 %
- Fraternity or sorority house: 0.2 %
- Other university housing: 3.7 %
- Parent/guardian home: 29.8 %
- Other off-campus housing: 45.4 %
- Other: 6.1 %

## Participated in organized college athletics:
- Varsity: 4.3 %
- Club sports: 11.7 %
- Intramurals: 20.3 %

## Member of a social fraternity or sorority:
- Greek member: 2.6 %

Demographics of Participating Institutions

Thirty four Canadian postsecondary institutions self-selected to participate in the Spring 2013 ACHA National College Health Assessment and 38,171 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only Canadian institutions that surveyed all students or used a random sampling technique are included in the analysis AND agreed to have their data included, yielding a final data set consisting of 34,039 students and 32 schools. **This report presents data from 16,123 students at 16 schools in Ontario**. All schools collected data via the ACHA-NCHA web survey. The mean response was 19% and the median was 20%.

Demographic characteristics of the 16 Ontario campuses follow:
